Seek is a multi purpose extension that provides tool to help the mail user in dealing with his/her personal data. These tools have been made possible by the open source code associated with it. Seek Tagging tool enables the user to tag his/her mails according to time, location, attachment, contact or other tags. It is very easy to configure and has intuitive GUI so that new users do not have any difficulty in using it. Seek Time Tracker tool helps the user to track the time spent in reading and replying to his/her emails, which is very important for an efficient usage of electronic mail. Seek Contact manager helps the user to manage contacts. It allows the user to save the contacts as a group which can be used for grouping mails for e.g. vacation or other contacts. Contact manager helps the user to sort and group the list according to the type of contact. Seek searching tool helps the user to browse the mails by filtering the mail according to

various tags. It incorporates various search functions, such as search by subject, date, sender, recipient, message, attachments or search by tag. Seek allows the user to store multiple mails in the same folder, which is not possible in the email client. Though it is possible to store multiple mails in a single folder, but it is not possible to find out which mails belong to a particular folder. Seek Tabs tool shows the user tabs on their left hand side. It has two modes; one is pinned tabs and the other is tabs which can be customized by the user for a particular purpose. The tabs can be customized by the user for the frequency of pinging the search results. Seek Pinging tool helps the user to pimp the search results by creating a ping every time the user gets the search results. This helps the user to track the progress of his/her searches. Seek Community is a growing user community and seeks to make Thunderbird a powerful and essential tool in the personal area. Optimus is a tool for converting the messages in MBOX to PST

format. It has the ability to search through the received message (old or new) according to the address book, contact or the date sent by the message. It has two modes: Sent Folders and Received Folders respectively.

The search inbox
